AGRICULTURAL

PRODUCT HIGHLIGHTS

FEATURES:

- Easy installation
- Versatile - can be used for head to head or outside single rows
- Heavy gauge pipe
- Hot Dipped Galvanized after welding
- New 8' stall now available
- 2 year prorated warranty

Designed for Easy Installation

Our Dairy Stall Systems are designed for easy installation, strength and corrosion resistance. The heavy gauge pipe and clamps are hot dipped galvanized inside and out for maximum protection. All welded products are hot dipped galvanized after welding.

Our versatile heavy clamp system can be used for head to head rows or outside single rows. The easy install clamp system allows for quick installation and adjustments. Our heavy-duty tee and cross clamps have locking holes that allow an extra measure of fastening and eliminates swiveling, unlike most found on the market. Special size loops, up-posts and clamps are available upon request. Additional tooling cost may apply. All stalls, top-rail, up-post, clamps and hardware can be mixed on the container to reduce shipping cost and allow for drop shipments direct to the building site.

Available in a wide variety of gauges, lengths, spacing and custom designs.

Part#	Length	O.C.	Style
DS1088	6'	36"	Dutch
DS1089	7'	36"	Dutch
DS1093	6'	36"	Dutch
DS1094	7' 6"	36"	Dutch
DS1095	8'	36"	Dutch
